ACTIVITY

Making A Watch

After making my class of young learners some clocks for class to practice time, one of my little boys said to me, "Teacher, I don't like clocks! I like watches!"

I thought about this for a bit and decided that if I can make my class a clock, surely I could make them watches using the same method. It just needed to be a bit smaller.

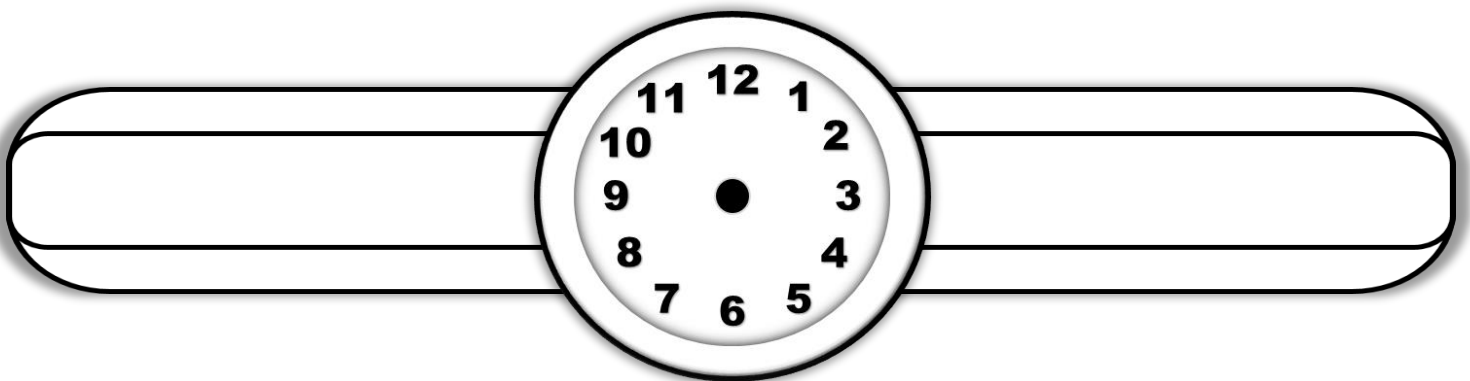

I got my tools (scissors, paper, hole punch, knife, laminating machine) and went to work on designing some different shaped watches and bands on a power point slide, converting the finished images into PNG files to add to a word document later.

Anyway, long story short, I designed these great little watches using pins to hold the watch hands in place and allowing them to spin to change the time. I added Velcro to the wrist bands to attach them to the wrist.

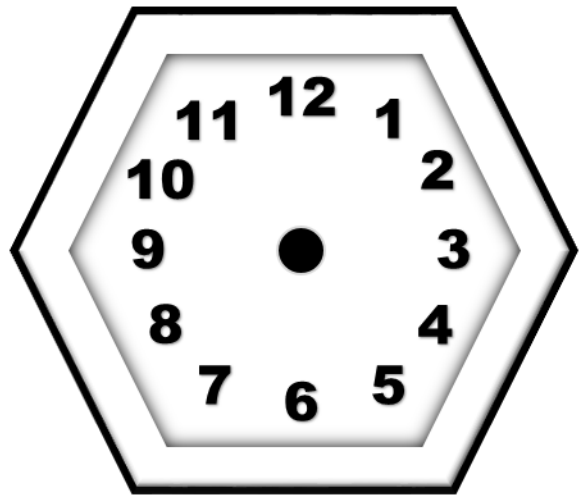

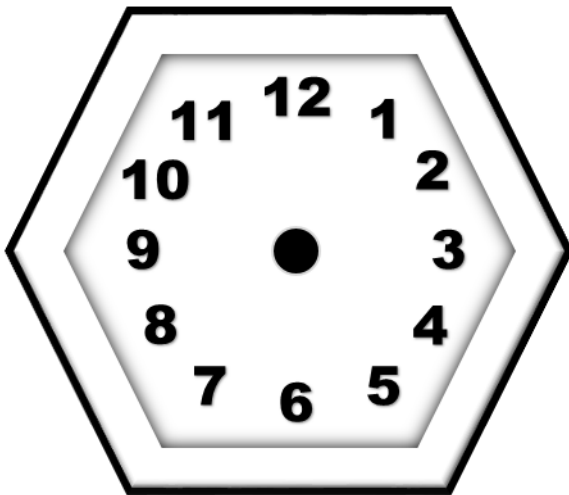

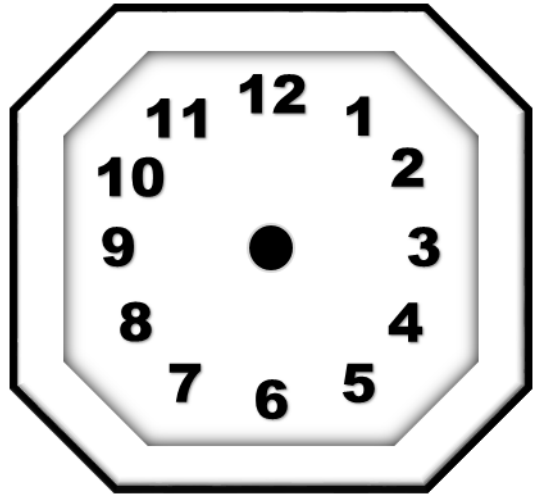

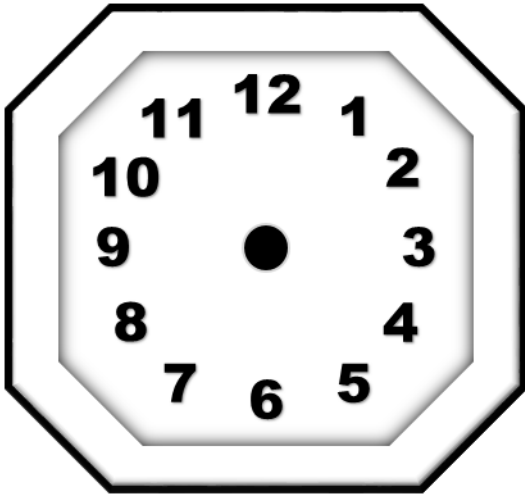

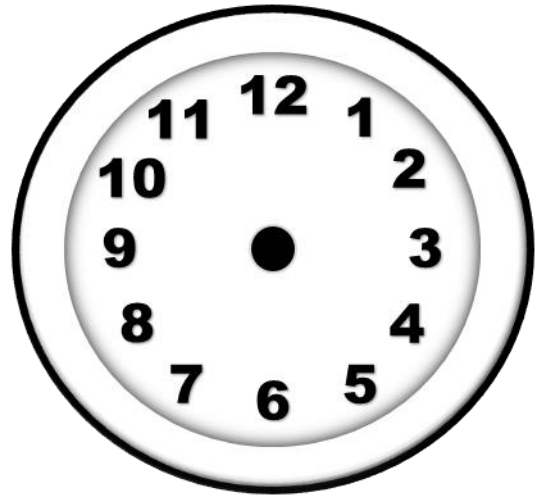

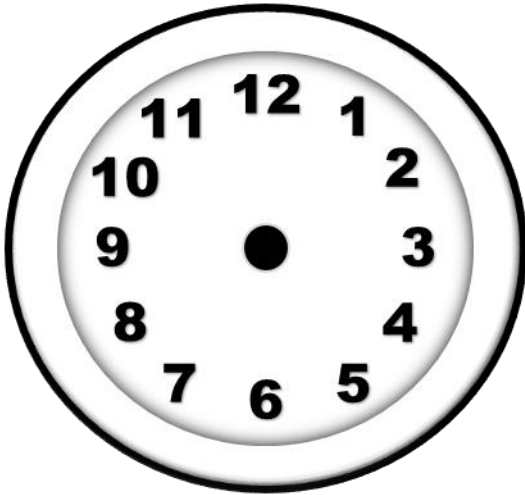

I introduced these into my very next class to try them out and I got a great response from the kids. The best was when they asked me if they could keep them, which I replied, "I've only made 2 so far, but I will let you cut and color your own to make later if we have time."

These were a big hit in my class and are not too hard to make. I have put lots of watch designs here to choose from and make, including blank templates if you want your young learners to practice cutting and coloring.

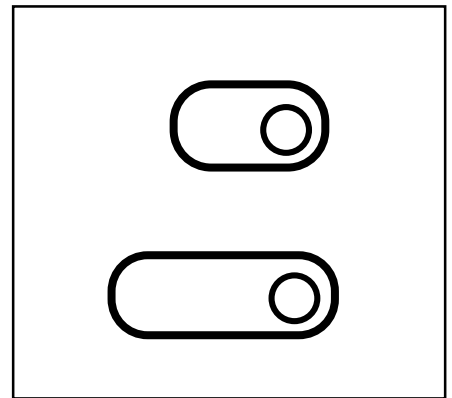

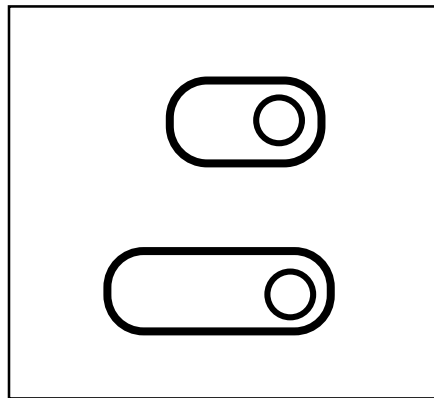

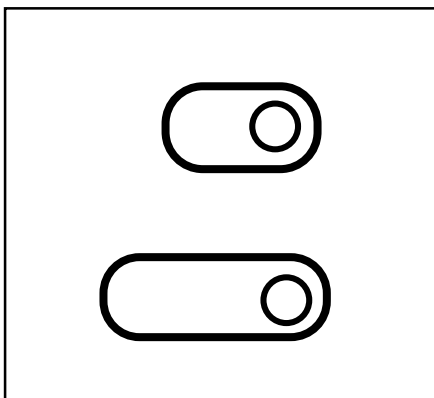

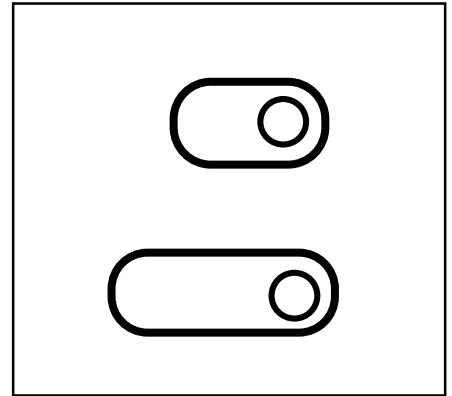

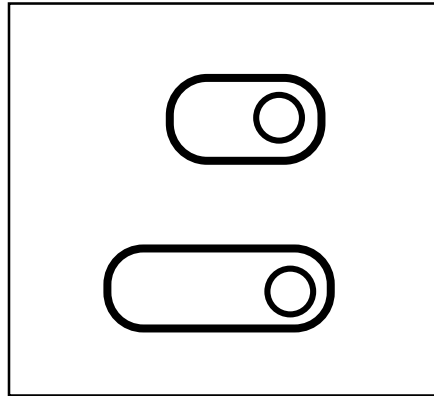

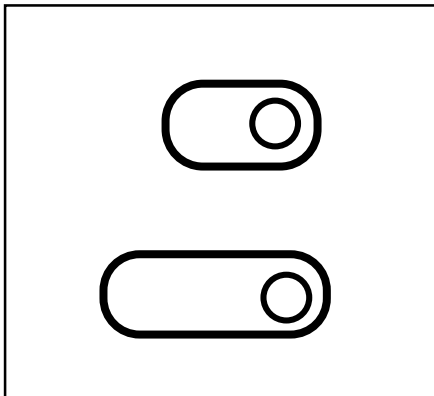

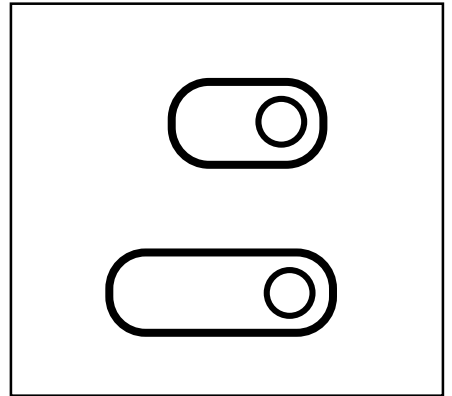

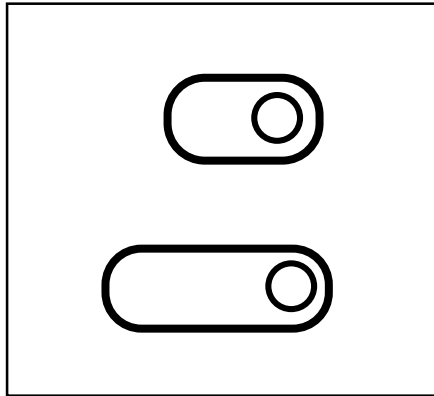

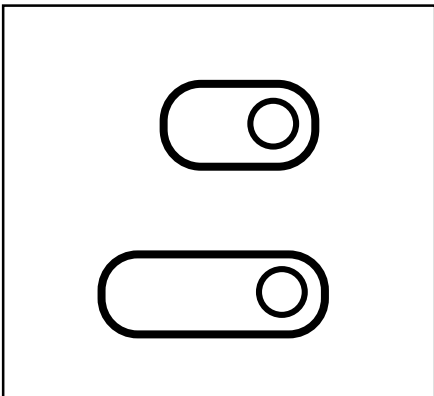

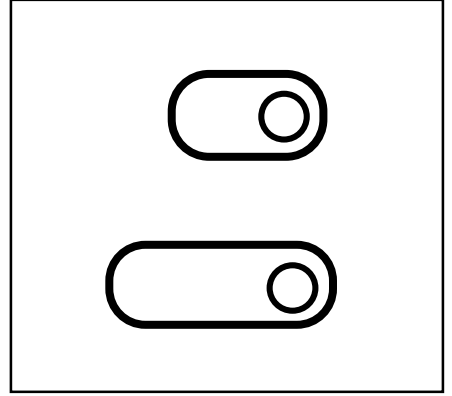

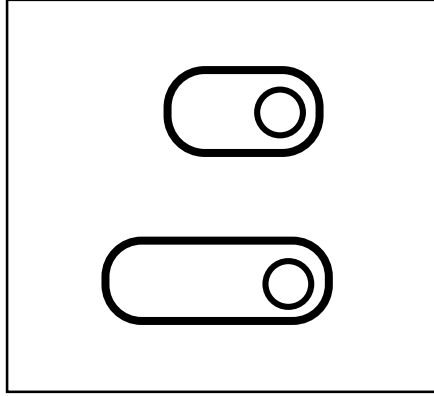

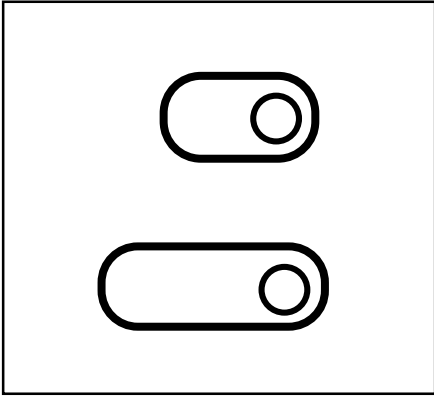

Best of luck and have a great TIME!

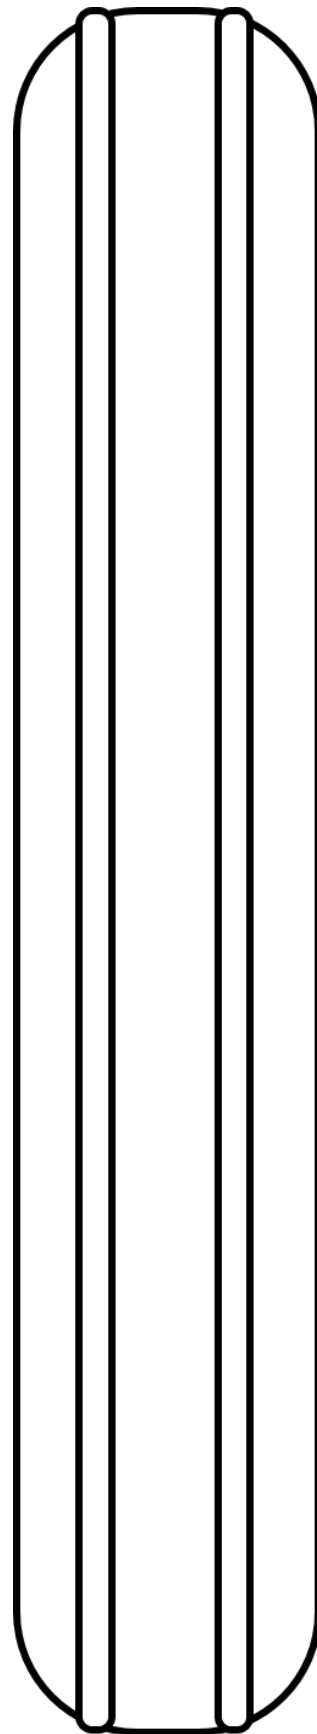

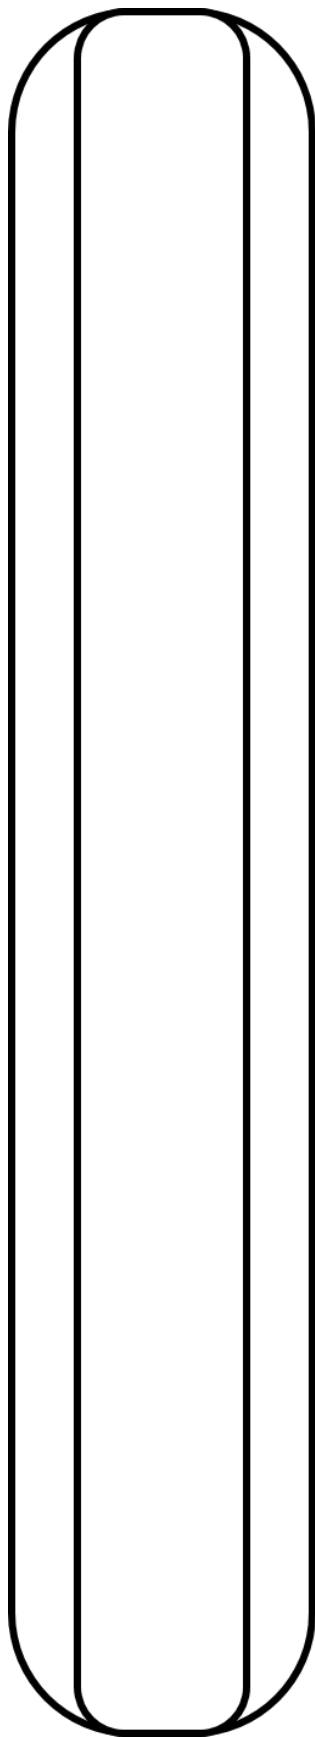

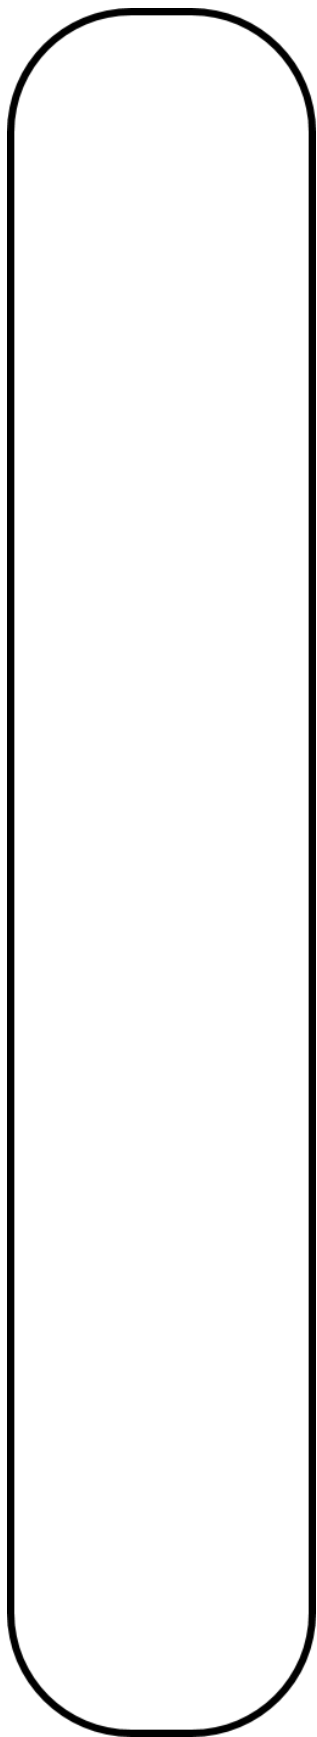

Choose a watch face. Cut and Color it to make your own design.

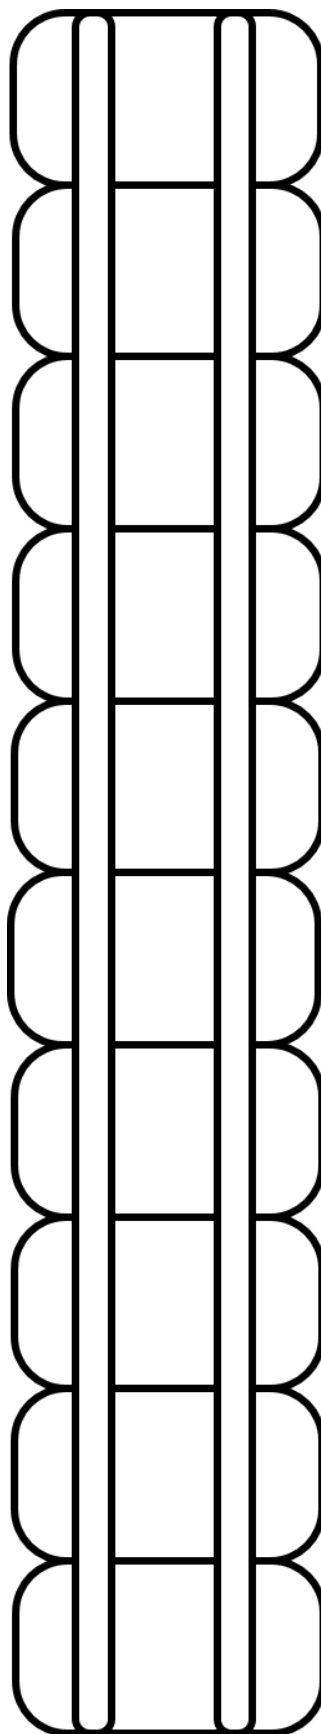

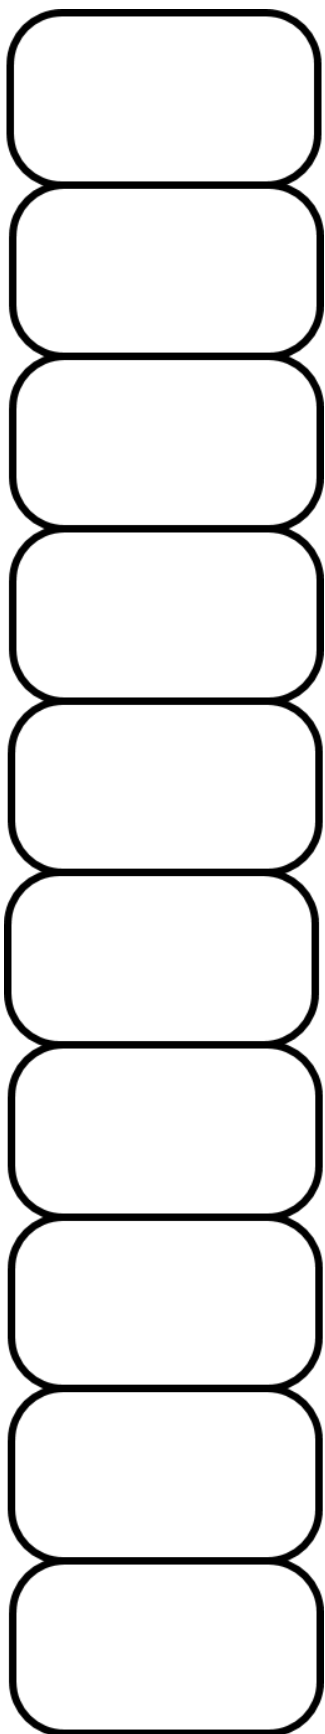

Clock Hands Sets for each watch

Choose a watch wrist band. Cut and Color it to make your own design.

Choose a watch wrist band. Cut and Color it to make your own design.

Predesigned Watches: Ready to print, cut, and use. Laminate for best result and longer life of the watches. Also use a pin and Velcro to attach watch hands and wrist bands.

Predesigned Watches: Ready to print, cut, and use. Laminate for best result and longer life of the watches. Also use a pin and Velcro to attach watch hands and wrist bands.

Thanks for checking out our watches here.

We hope you can use these with your young ones and students in class. Check us out on the internet on social media and our website. If you want to know more, click on the links below to see what ESL KIDZ has to offer teachers, parents, and students. Good luck and have a great TIME!
